

Stat Meth Business (33:136:385:09)

Tom Bruning

Sept 4, 2018

Instructor

Thomas Bruning

email: tom.bruning@gmail.com

cell: 201.204.0585

Office Hours: by appointment

Classes: Thursday; from 6:40 pm to 9:40 pm.

Classroom: BRR, Room 5073.

Course Objectives

Students will be introduced to basic statistical methods, particularly understanding the concepts of uncertainty and how the understanding of probability is integral to making business decisions. They will be able to design an experiment, analyze observations and make reasonable predictions and decisions about the business events. At the conclusion of this course the student will have knowledge of:

- Sampling distribution and estimation
- Confidence Intervals
- Hypothesis Testing
- Experimental Design
- Linear Regression
- Multiple Regression
- ANOVA
- Logistic Regression
- Time Series

Resources

Textbook:

Title: *Basic Business Statistics: Concepts and Applications*

Authors: Berenson, Levine, Krebbel

Publisher: Pearson

14th Edition (2017)

Computer Resources

Title: Microsoft Excel, or equivalent

Additional Resources: Data Analysis plugin

Prerequisites

The following prerequisites are **essential** for successful learning and understanding of this course:

- * An introductory course in probability and statistics such as 960:285
- * Basic college algebra
- * Working knowledge of Excel spreadsheets

ACADEMIC INTEGRITY

I do NOT tolerate cheating. Students are responsible for understanding the RU Academic Integrity Policy (https://slwordpress.rutgers.edu/academicintegrity/wp-content/uploads/sites/41/2014/11/AI_Policy_2013.pdf). I will strongly enforce this Policy and pursue all violations. On all examinations and assignments, students must sign the RU Honor Pledge, which states, “On my honor, I have neither received nor given any unauthorized assistance on this examination or assignment. Don’t let cheating destroy your hard-earned opportunity to learn. See business.rutgers.edu/ai for more details.

Course Overview

This course will review the basic statistical methods essential for doing business analysis, in particular when outcomes are uncertain and future events are subject to chance variation. We will study basics of data analysis using computer software.

Course Web site information and discussion

Blackboard

All class discussions, assignments, and materials will be posted to Blackboard. Please review this site 2-3 times per week for further information.

Homeworks, Exams, and Grading Policy

Homework (10% of final grade)

I will post approximately 10 homework assignments during the semester. All homework will be completed in Blackboard. You are responsible for completing the work, on time. Statistics is not a *spectator sport*, it is a *participatory sport*. I have it on good authority, (10+ years of teaching statistics experience) if you do not do the work you **will** not understand and succeed in this class. If you miss two (2) homeworks you will receive an **F** for this class. This is true regardless of your grades on the other homework assignment and your grades on the midterm and final.

Midterm (40% of final grade)

The midterm is a full period test that is scheduled during the 7th week of class.

Final (50% of final grade)

Schedule TBD

Your final grade is not subject to negotiation. If you feel I have made an error, submit your written argument to me within one week of receiving your final grade. Clarify the precise error I made and provide all due supporting documentation. If I have made an error, I will gladly correct it. But I will adjust grades only if I have made an error. I cannot and will not adjust grades based on consequences, such as hurt pride, lost scholarships, lost tuition reimbursement, lost job opportunities, or dismissals. It is dishonest to attempt to influence faculty in an effort to obtain a grade that you did not earn, and it will not work.]

Topic Schedule

Table 1: Tentative Topics and Dates

Week.of	Topic	Chapter.s.	Additional.Info
9/2/18	Intro & Data Analysis	Chapter 7	Review Chapters 4,5,6
9/9/18	Sampling Distributions	Chapter 7	
9/16/18	Estimation	Chapter 8	
9/23/18	Confidence Intervals	Chapter 9	
9/30/18	Hypothesis Testing single sample	Chapter 9	
10/7/18	CI and Hypothesis two samples	Chapter 10	
10/14/18	Midterm		
10/21/18	Simple Linear Regression	Chapter 13	
10/28/18	Spring Break		
11/4/18	Experiment Design	Chapter 11	
11/11/18	ANOVA	Chapter 11	
11/18/18	Multiple Regression	Chapter 14	
11/25/18	ANOVA	Chapter 14	
12/2/19	Categorical Data Analysis	Chapter 12	
12/9/18	Time Series	Chapter 16	
	Final		

Support Services

If you need accommodation for a disability, obtain a Letter of Accommodation from the Office of Disability Services. The Office of Disability Services at Rutgers, The State University of New Jersey, provides student-centered and student-inclusive programming in compliance with the Americans with Disabilities Act of 1990, the Americans with Disabilities Act Amendments of 2008, Section 504 of the Rehabilitation Act of 1973, Section 508 of the Rehabilitation Act of 1998, and the New Jersey Law Against Discrimination. <https://ods.rutgers.edu>
